

Crisis in Power Engineering Education: A National Security Concern Minneapolis, MN October 21-22, 2022

Great River Energy

Utility/Electric Cooperative

Distributed Renewables
Demand Response

Transmission Engineering

Company Background

Great River Energy is a not-for-profit wholesale electric power cooperative serving 28 member-owner distribution cooperatives. Together, our systems provide reliable, cleaner electricity while maintaining affordable rates for 1.7 million people.

We utilize a mixture of renewable and traditional generation to serve electric power to greater Minnesota, but we also rely on innovative distributed resources and flexible load programs to maintain agility to match load to renewable energy power production.

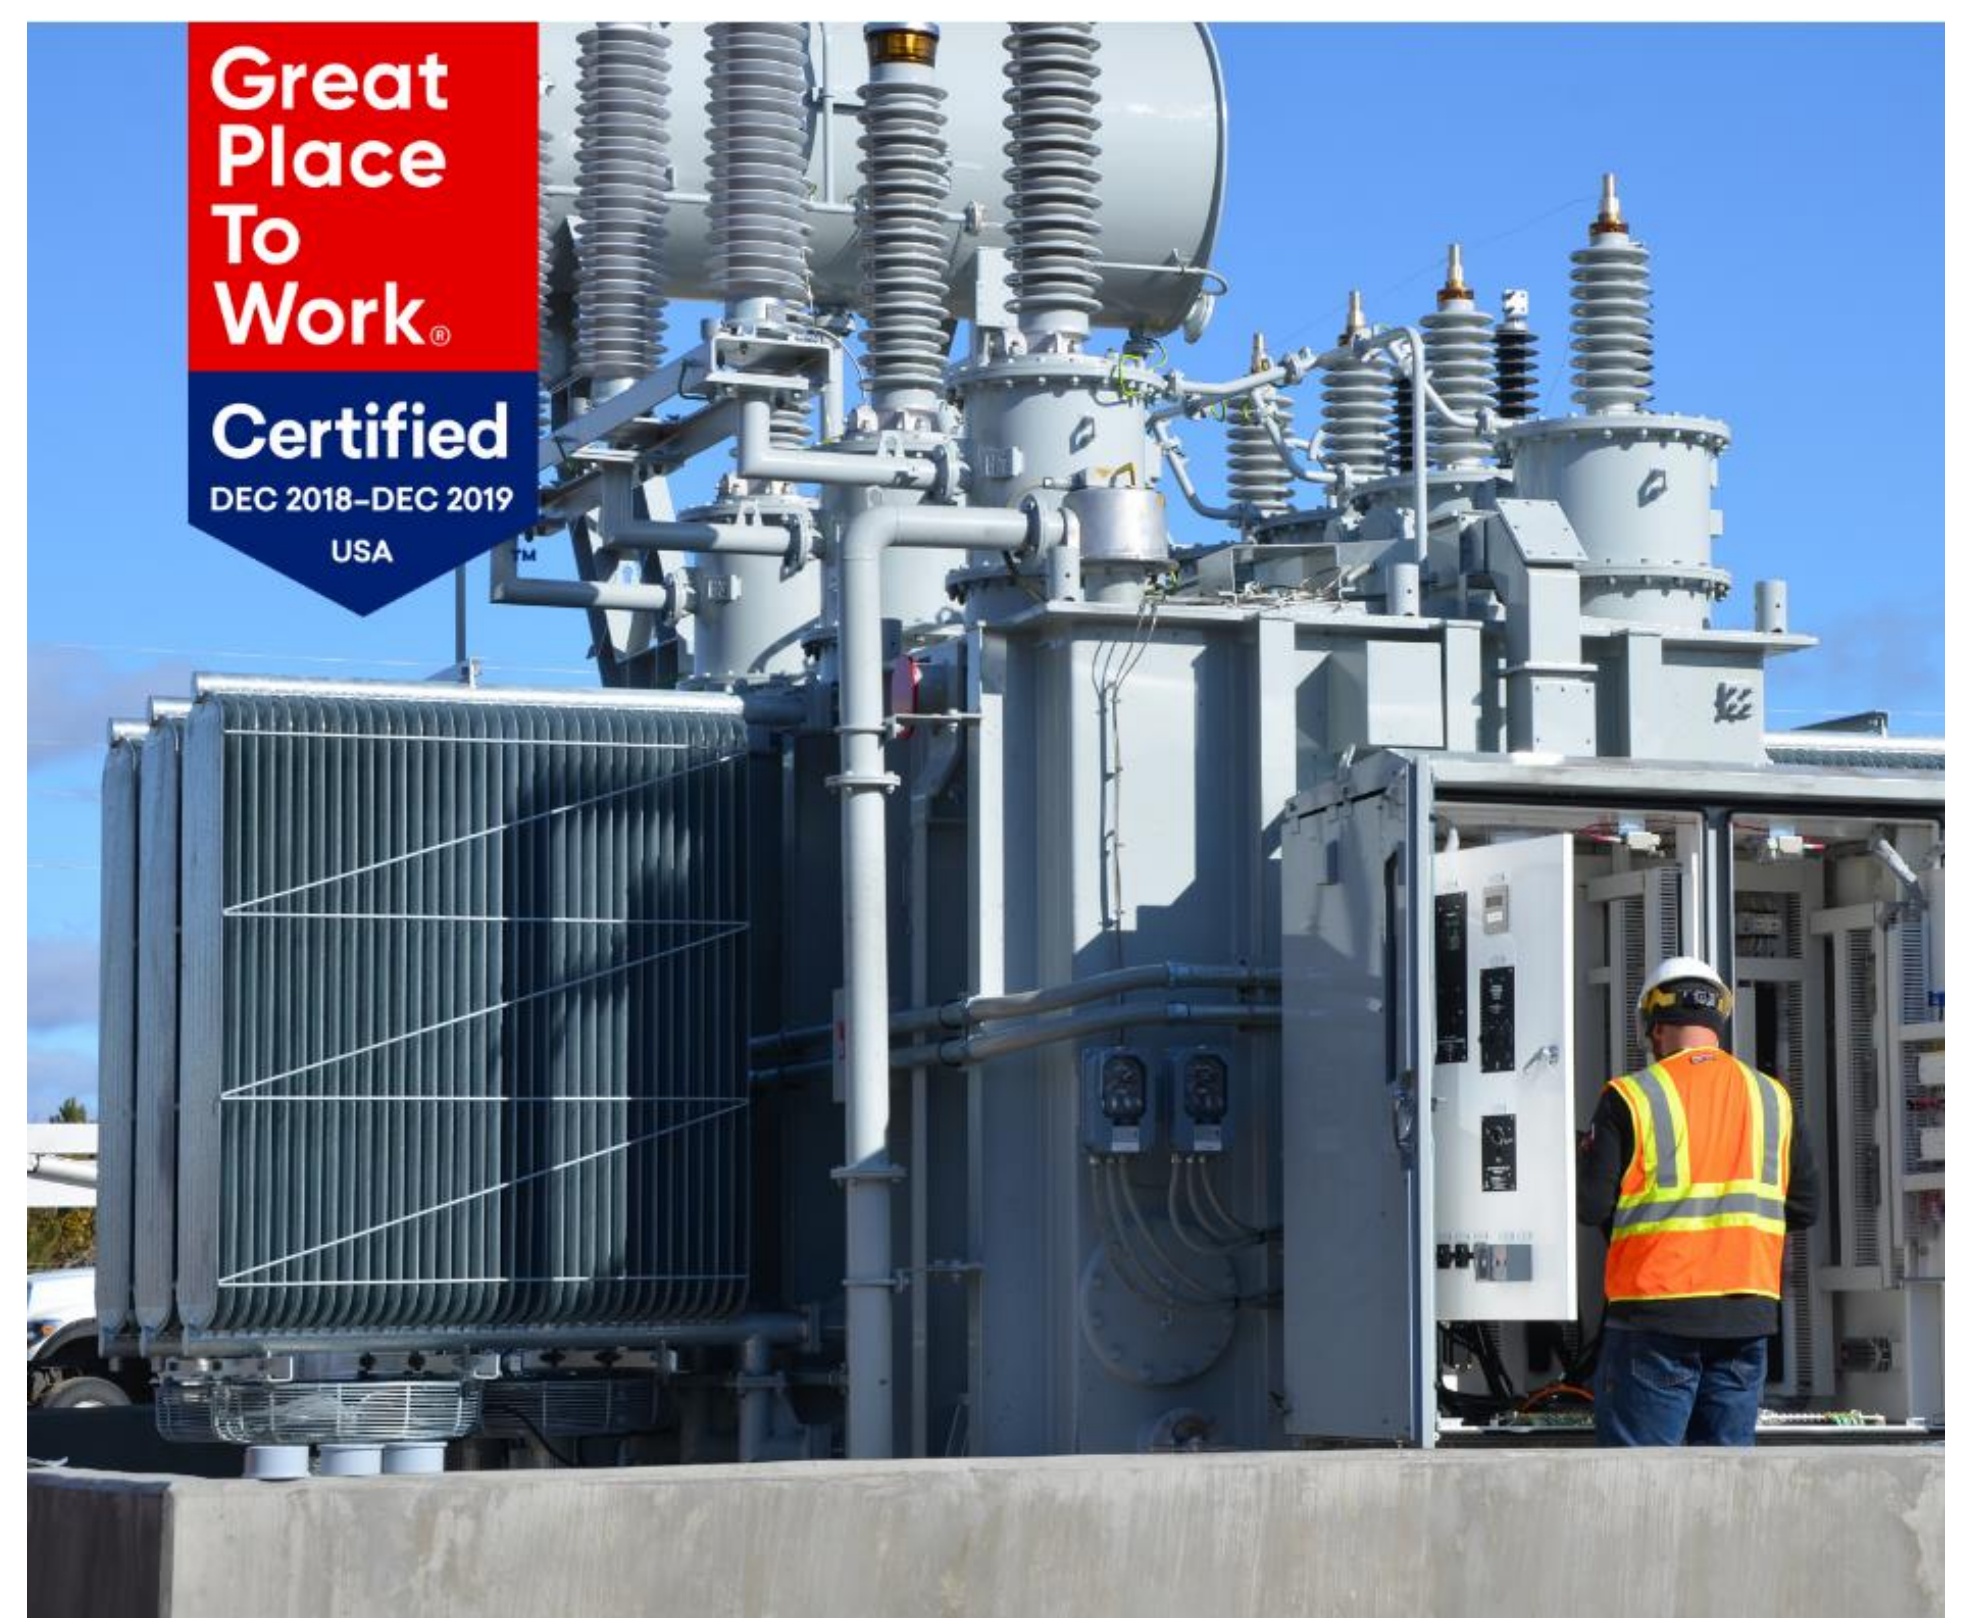

Headquarters: Maple Grove, MN

Power and Energy Focus

We rely on flexible power electric capabilities to manage voltage and power flows on our grid, enabling distribution renewable generation to grow throughout the feeder network.

Smart meter technology and new data acquisition tools allow for data scientists and analysts to find new ways to improve efficiency and avoid expensive power plant construction.

Power and Energy Talent Base

Demographics:

MN - 500
ND - 49

Average Tenure: 12.53 years

Division Demographic:
